

**Blank, Amy**

**Abdomen CT Exam, 10/10/2008**

**Preliminary Info**

<b>Name:</b>	Blank, Amy	<b>Exam Date:</b>	10/10/2008
<b>Patient ID:</b>	123456788	<b>Exam Site:</b>	RSNA
<b>DOB:</b>	1/1/1980	<b>Procedure:</b>	Abdomen CT
<b>Age:</b>	28 yrs	<b>Technique:</b>	Routine axial sections with selected multiplanar reconstructions.
<b>Ref. Phys:</b>	Martinez, David, M.D.	<b>Contrast:</b>	None Followed by Non-ionic (Ultravist 300)
<b>History:</b>	Weight loss, abdominal pain.	<b>Slice Thickness:</b>	Contiguous 10 mm and selected overlapping 5 mm sections
<b>Allergies:</b>	Shellfish	<b>Comparison:</b>	6/01/2008
<b>Premedication:</b>	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>	<b>Accession #:</b>	123458
		<b>Study UID:</b>	1.1000.100000.123456793

**Findings**

<b>Liver and Spleen:</b>	The Liver appears normal in size and is homogenous in consistency. The spleen appears normal in size and consistency.
<b>Gall Bladder/Bile Ducts:</b>	The neck and fundus of the Gall Bladder are seen in the fasting state with no apparent calculi or abnormal contents. The Common Bile Duct measures less than 5mm in size with no apparent calculi.
<b>Pancreas:</b>	There is a 4 cm focal enlargement of the head of the pancreas with a complex pattern of attenuation and irregular margins. This focal enlargement is suggestive of carcinoma.
<b>Kidneys:</b>	The Left and Right kidneys are visualized and appear normal in size and contour with no apparent solid, cystic or complex masses. The parenchyma appears normal in density with a normal appearing volume of renal cortex. The collecting systems and proximal ureters are visualized and appear normal with no apparent hydronephros is. Normal appearing artery, vein and hila are seen. The bladder appears normal.
<b>Adrenal Glands:</b>	The adrenals are visualized bilaterally and appear normal in size and attenuation.
<b>Aorta:</b>	The aorta appears normal in dimension from the level of the diaphragm to the bifurcation and measures less than 3 cm in diameter.
<b>Adenopathy:</b>	The retroperitoneal space and nodes appear normal.
<b>Ascites:</b>	No ascites is seen in the abdominal cavity.
<b>Pelvis:</b>	The uterus, ovaries, adnexal structures and cul-de-sac are visualized and appear normal.

**Impressions and Recommendations**

There is a 4 cm focal enlargement of the head of the pancreas with a complex pattern of attenuation and irregular margins. This focal enlargement is suggestive of carcinoma.
