

**Blank, Amy      Thyroid General Ultrasound Exam, 8/14/2008**

**Preliminary Info**

<b>Name:</b>	Blank, Amy	<b>Exam Date:</b>	8/14/2008
<b>Patient ID:</b>	123456737	<b>Exam Site:</b>	RSNA
<b>DOB:</b>	1/1/1980	<b>Procedure:</b>	Thyroid General Ultrasound
<b>Age:</b>	28 yrs	<b>Comparison:</b>	7/01/2007
<b>Ref. Phys:</b>	Crow, Don, M.D.	<b>Accession #:</b>	123487
<b>History:</b>		<b>Study UID:</b>	1.1000.100000.123456744
<b>Premedication:</b>	YES <input type="checkbox"/>		NO <input checked="" type="checkbox"/>

**Findings**

Thyroid

**Thyroid:**

A thyroid nodule measuring 2.0cm x 3.0cm x 3.0cm is identified in the right lobe of the thyroid. The nodule is solid in composition and contains calcification. The is very suspicious for carcinoma. There is marked distortion of the right lobe.

**Impressions and Recommendations**

Abnormal thyroid sonogram with heterogenous solid nodule with calcification of the right lobe of the thyroid. This is highly suspicious for a malignant lesion. The left Lobe of the Thyroid appears normal.
